Les Contes des Animaux

In 2003 Bodega Films France approached me and invited me to put together a compilation of my films. I chose 7 films from the WEB and Tiga. Twenty one 35mm prints were released nationally in France starting with a Launch at The Pompidou Center. I was taken on a tour of France by the Distributors and I lectured and ran work shops throughout France.

The film was screened At Cinema des Antipodes festival Rencontres Internationales and was the first film to get a full house at this festival. The film had to be shown twice in a row because the children were too numerous for one screening. Les Contes screened also in La Reunion Island's International film Festival where I also ran workshops with the local schools.

In 2004 Les Contes des Animaux was released on DVD in France and continues to be screened at selected art house cinemas. The remaining WEB films were dvd extras along with three documentaries.

Les Contes des Animaux was screened at BIFF as part of the new childrens section of the festival.

As a result selected films from Les Contes des Animaux have screened at the 2004 New York Children's Film festival and also at the 2004 London Film festival.

In 2008 Panda from LCDA and the WEB was invited to be part of the the first New York Children's Film festival online festival.
